EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, page 1, between the title and line 1, the following paragraph was inserted:

-- This application is a 371 of PCT/IB02/05712, filed December 23, 2002. --

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the PTO-892 each disclose a recording device including a delay element.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest an optical record carrier recording apparatus and method for recording data by irradiating a radiation beam (5) onto a recording surface (2) of an optical record carrier (1) comprising: generating the radiation beam (5) by a radiation source (4); generating a clock signal (clk) by a phase locked loop (10); generating a recording signal (S1) by a recording signal generating unit (9) from a received information signal (S) using the clock signal (clk); generating a timing signal (S2) from the recording signal (S1), the timing signal (S2) having an increased timing resolution with respect to the recording signal (S1); and receiving the timing signal (S2) and driving the radiation source (4) by a driver unit (7), wherein the recording signal (S1) is received by a delay means (11) for generating the timing signal (S2), **the delay means (11) comprising a first group (14) of delay cells (20) having a first delay and a second group (17) of delay cells (22) having a second delay, the difference between the first and the second delay forming a unit delay being smaller than the first and the second delay, and wherein the number of unit delays for delaying the recording signal (S1) is selected by a selection means (12) by controlling the number of delay cells (20, 22) of the first and the second group (14, 17) to be passed by the recording signal (S1).** (bold language emphasized)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
